

Benefits (Advantages):

- Faster Development
- A Library of modules
- Programmers are given sub-tasks as per their expertise.
- Less errors / less debugging.
- Better after development support.

Breakup

- Modularisation
- Top Down Design
- Decomposition

Tasks

- Sub tasks ✓
- modules ✓
- Subroutines ✓
- procedures ✓
- functions ✓

Disadvantages (challenges):

- Tough to compose several sub-routines together to form a single application
- Communications among subroutines.
